Architecture AutoCAD Architecture has a REST-based architecture that allows creating integrated building models from a 3D CAD-based building model that describes building's structure and its users. The architecture includes: user-facing REST API building data exchange (building database) based on XML-RPC protocol workflow engine for real-time data access scripting language (AutoLISP) web-based application interface In addition to public interfaces that allow end users to run AutoCAD, AutoCAD Architecture allows integration of all other AutoCAD extensions and products, including application of CAD drawings to the building model, location of CAD drawings in a building model, and integration of architectural drawings with other types of construction drawings (e.g. mechanical, structural). Architectural applications that are based on AutoCAD Architecture include: Autodesk Architecture Autodesk Civil 3D Autodesk Project BIM 360 Architecture Autodesk Project BIM 360 Design and Planning Autodesk Project BIM 360 Management Autodesk Project BIM 360 Construction Autodesk Project BIM 360 Construction Manager Autodesk Project BIM 360 Design Autodesk Project BIM 360

Hillary Clinton's campaign chairman John Podesta is the latest Trump Administration official to be sent to prison following Tuesday's plea deal. Former Trump campaign manager Paul Manafort pleaded guilty to a second count of conspiracy against the US. One count was conspiracy against the US, and the other was a count of conspiracy to obstruct justice. He is the first Trump associate to plead guilty in the ongoing investigations into alleged ties between the Trump campaign and the Kremlin. A long list of Trump administration officials — including Donald Trump's campaign manager — is headed to jail following Tuesday's federal court plea deal, as the Justice Department continues its investigation into Russian meddling in the 2016 presidential election. The deal was announced Monday afternoon in a filing to the federal court in Virginia, and one of the most high-profile is John Podesta, Clinton's campaign chairman. Podesta has been indicted, but he and his legal team are negotiating a deal to keep him out of prison. Podesta was charged last month with making false statements on his federal tax returns. The plea deal gives him credit for the time served in jail since the indictment was announced. The plea deal also includes no jail time. The charge against him was conspiracy to defraud the US, which carries a sentence of up to five years in prison, and the charge of making false statements carries a sentence of up to 20 years. According to the filings, the first charge will be dropped if Podesta completes eight hours of community service, a requirement set by the court. "The prosecution of Mr. Podesta is the result of his willful and deliberate decision to disregard the law," US Attorney Geoffrey Berman wrote in a letter explaining the plea deal. "His failure to make the required disclosures to the Office of the District Director and the IRS, and his failure to file the required tax returns, were not an oversight. They

When entering a room name, you can now automatically use the abbreviations for your company and department. When you open a new drawing, the drawing number is no longer displayed. As the drawing is loaded, the drawing number is now displayed in the upper left-hand corner of the screen. Note: When a message is set to be displayed at startup, it will still appear when you open the drawing. We now automatically fill in the contents of the geometry filter when the geometry filter is open. When you make changes in the header, the last name is now automatically filled in. When the status bar is on, the 3D toggle on/off icons are now displayed. We now display four minor units in the measurement tool options: millimeters, centimeters, inches, and meters. You can now include the closest major unit (either cm, mm, in, or m) in the measurement
