With CleverCat, you can arrange your products on brochures in a customizable way. You can manage the whole process of customizing catalogs: decide whether you will create a single page layout or add product descriptions and images to pages. Then, you can create and print many catalogs at once. Moreover, you can change the logo and background images and you can add data such as descriptions, prices, images and more. Once you've finished creating your catalogs, you can automatically send them to the printer. CleverCat has many customizable features, so that you can create an attractive and professional-looking catalog. With CleverCat, you can create your catalogs with a modern look, easy navigation and a simple customization interface. What's New in this Release: \* Improved speed and performance \* Added a search form \* Added a new "Print On Demand" option \* Changed the background image \* Added a new feature, called "Brochure Templates", where you can create and customize multiple templates.

Download CleverCat Similar Software Product Catalog Creator - Standard Edition Product Catalog Creator is a powerful software for creating a single page web application for product catalogs. The software is mainly focused on sales promotion and the sales promotion team might be the only user of this product. Crowdfunding Platform Product Catalog Creator The software provides you with a unique crowdfunding platform in which you can create, manage and promote the sales of your product catalogs. It is based on images of products displayed on a page.

Mary Ann Braxton Mary Ann Braxton (1918 - June 16, 2018) was an African-American social worker who grew up in Atlanta, Georgia, and attended Morehouse College, Columbia University, and the University of Pennsylvania. She founded the Atlanta chapter of the National Black Social Workers Association, served on the board of directors for the National Association of Social Workers, and co-founded the Atlanta branch of the National Association for the Advancement of Colored People. She is a member of the National Association of Black Social Workers and the NAACP. Category: Software for managing your products  
 Catalog: Visual product identity  
 Author: CLEVER CAT from ACE PDF catalog software  
 Description: Create and print professional catalogs with this useful software. CleverCat is a reliable and useful software, designed to help you in creating and customizing product catalogs. The application can be a useful tool in promoting products and marketing campaigns since it allows you to arrange the page layout in any way you like. Creating a visual product identity The software enables you to create and print large numbers of promotional brochures, and adjust the page layout in order to suit your or your employer's requirements. Thus, you may edit the header and footer height, spacing, units arrangement, as well as page formatting. In the unit display management tab, you can add or remove items from the page, such as images, text boxes, titles, price tags and descriptions. Using the Detail Table function, you can add multiple items, then freely resize and arrange them on the letter or landscape formatted page. Products database The software includes multiple catalog templates, but you can easily add your own models or edit the existing ones. Moreover, you may create a database of all the products, sorted by categories, in order to manage your inventory. You can assign data such as name, size, stock, price and images to each object in the inventory. The different categories of products require separate promoting brochures, for instance, a book commercial can be more creative than a cookware catalog. The inventory table is adjustable, allowing you to insert or delete rows or columns, add new categories, products or update images and product data. You may view a preview of the final catalog layout, before sending it to the printer. You can create your product database with CleverCat or import it from another supported file, such as an Excel spreadsheet. Conclusion CleverCat is an intuitive tool that enables you to manage your products, with professionally looking catalogs. The software enables you to set up or update the database of products, as well as design page layouts, using templates or creating them from the beginning to the end.
