What's New in the?

CopyFilenames is an innovative utility for Windows that allows one to copy filenames without the need to resort to the often clumsy, "F2 + Ctrl+C" method. It comes equipped with a series of great features, such as the ability to copy the names of multiple selections, delete the selected items immediately after copying, and much more. Moreover, the software will enable users to obtain the name of each file or folder, even if they are selected in different locations of the file manager. In addition to the above, many people will find the software easy to use, intuitive and streamlined. With CopyFilenames, they will be able to obtain names in an easy-to-select manner, simply by using the context menu with no need to worry about complicated keyboard commands and keystrokes. Features: Easy to install application that will seamlessly integrate with the Windows context menu Automatically copy the names of the selected files or folders with a single mouse click Copy the names of one or multiple items, even if they are selected in different locations of the file manager Deletes the selected items after the names have been copied Selections can be copied on either the entire directory, current folder or just a part of it Filenames will be copied in the same order as in the directory People will not have to copy the names of the selected files and folders manually Delivered with a well-organized interface that will not be daunting for novice users Users can copy just the names of the selected files or folders, or copy them and delete the selected items immediately after Before downloading, make sure you have installed all the latest updates for your version of Windows. How to download and use CopyFilenames CopyFilenames Setup The product includes a clean and easy to use installer that will bring up the simple built-in installation wizard, after which the program will be ready to use. After this stage, users are free to enter the application setup options. Getting Started CopyFilenames After Installation In order to use the software, one needs to choose its location in the Start menu. When opening the application, users will be able to choose between two types of operation, single file, multiple files or directories or both. If multiple selections are chosen, one will have to enter the amount of files or directories that will be covered. After the actual filenames have been obtained, one will be able to
