System.Console.WriteLine("User input a number: "); string input = System.Console.ReadLine(); System.Console.WriteLine("User input a number: "); string input3 = System.Console.ReadLine(); System.Console.WriteLine("User input a number: "); string input4 = System.Console.ReadLine(); System.Console.WriteLine("Your number is {0}", input); string input1 = input + input2 + input3 + input4; System.Console.WriteLine("Your number is {0}", input1); I need it to read the four variables and input them into one equation. How do I do this? Thanks. A: You can create a method for that: private static int ComputeValue(string[] values) { return values.Sum(); } public static void Main(string[] args) { string[] values = new string[4] {"Hello", "World", "How are you", "Fine?"}; Console.WriteLine("User input a number: "); string input = System.Console.ReadLine(); System.Console.WriteLine("User input a number: "); string input4 = System.Console.WriteLine("User input a number: "); string input4 = System.Console.WriteLine("User input a number: "); string input4 =
