LG is a company that designs, manufactures and distributes a wide range of consumer and commercial electronic products. After you have registered, you may install more than 20 LG NAS models. In this kind of a situation the key to security is to make sure that you know what you're doing before you do it. They're doing more than they ever have before; they don't think it's a bad thing to sell the NAS device at a loss to their customers. So there are costs involved in setting this up, but it's just not possible to argue with them. I will be very sad to leave this tutorial because I learnt so much about NAS and networked storage devices. I found out so much about this NAS unit and about networking in general. The support from the video coder they hired was exceptional and for me, it was a great learning experience. 1. Took me about 30 minutes. 2. Took me about 1 1/2 hours to figure out how to do it. 3. Took me about 2 hours to make it work. 4. Took me an additional 30 minutes to get the resolution down to 1:1. We're selling the idea to our customers at about \$1 a file. We're using a lot of RAM, and that's really a limitation. It's probably \$800-\$1,000 for RAM in a Server with most of the RAM. 5. Took me another 30 minutes to get the video up.
