We are living in amazing times. People at many different levels of the music business are now able to create and publish their own songs with nothing more than a computer, Internet connection and a keyboard. This is the future of music, so it is very important that people be able to write their own songs with the same easy-to-use software that they use to compose their songs in the first place. For this reason, we are very happy to announce the release of MasterWriter 4.0, a version of the Premier Guitar-endorsed software that we developed for our company. MasterWriter is a tool to help organize writing data – words, grammar, and reference sources – for creative writers. It gathers a wide range of .
