Protect data against physical defects such as scratches, broken drives and bad blocks. There are two versions: DOS and Windows.

DOS Version: It is created for the system that has no operating system. On old Windows systems, it must be installed as a system tool. In Windows 10, it can be downloaded as a system tool from Microsoft Store.

Windows Version: To use this version on Windows, the computer must be installed on a Windows system. In Windows 10, it can be downloaded as a system tool from Microsoft Store. In Windows 7 SP1, it can be downloaded from the compatibility list of KMS.

Features of the software: Detects bad sectors and tries to repair them automatically. Detects bad sectors and tries to fix them automatically. Supports both physical and logical (NTFS) defected sectors. Tries to fix bad sectors using the

software provided by the manufacturer. Presets to select the appropriate speed to read the bad sectors. Is compatible with many types of hard drive devices. Provides system to system support. Is compatible with many types of hardware. Provides system to system support. It is compatible with the BIOS of the system. The software has been updated several times to ensure a secure operating system. Compatibility. Supported formats. Memory usage. Supported hardware. System requirements: Windows 10, Windows 8/8.1, Windows 7, Windows Vista, Windows 2000, Windows NT, Windows Me, Windows . Windows XP. Installing of the software. If you have a malfunctioning HDD, there is a chance that there is one or more defected sectors in the HDD. The software will detect those defected sectors, and if they are found, the software will try to repair them automatically using the different available methods. First, if the software detects that the

defective sector is a physical defect (flash chip or controller failure), the software will attempt to repair it, and if it succeeds, it will do so using the computer's normal sector reading or remapping methods. If the sector cannot be repaired, the sector will be marked as a damaged sector. If the sector is a logical defect (defective 570a42141b
