NOTES: This review has been written using the free version of the app. The developer offers a premium version of the app, which is available for both Windows and Mac OS. The review was based on the following dataset:Wallerian degeneration of the pyramidal tract following a traumatic lesion to the head. A case of Wallerian degeneration of the pyramidal tract following a traumatic lesion to the head is described. This rare finding is thought to have occurred because of a dysfunction of the cholinergic system in the corticospinal tract, caused by a lesion to the pons and medulla. Similar degeneration of the pyramidal tract has been seen in the chronic phase of multiple sclerosis, and also in cases of amyotrophic lateral sclerosis, or of Wilson's disease. The pyramidal tract degeneration observed in this patient may also be related to the release of potassium from the degenerating neurons. The literature concerning Wallerian degeneration in the pyramidal tract after a cerebral lesion is reviewed. Still, this future is not in sight. It might come in a decade or so, when you 1d6a3396d6
