
TimeLord

TimeLord is an easy way to test the behavior of your program in a specific moment. Simple Example: `package com.tipprick.test; import org.joda.time.DateTime; import org.joda.time.DateTimeZone; import org.joda.time.format.DateTimeFormat; import org.joda.time.format.DateTimeFormatter; import java.util.Date; public class JodaTimeLTest { public static void main(String[] args) { Date time = new Date(); Date utcTime = DateUtils.toDate(DateTime.now(DateTimeZone.UTC)); Date now = DateTime.now(DateTimeZone.UTC); Date testTime = DateTime.now(DateTimeZone.UTC); DateUtils.printTheTime(DateTime.now(DateTimeZone.UTC)); DateUtils.printTheTime(utcTime); DateUtils.printTheTime(now); System.out.println("Hello World"); } } //Debug Test Run**:""shell [I@1702520b:~/download] pwd /home/André/download [I@1702520b:~/download] java -version java version "1.7.0_95" OpenJDK Runtime Environment (icedTea 2.5.3) (7u95-2.5.3-0ubuntu0.14.04.3) OpenJDK 64-Bit Server VM (build 24.95-b01, mixed mode) [I@1702520b:~/download] [I@1702520b:~/download] joda-time-2.1-jre7.jar [I@1702520b:~/download] joda-time-2.1.jar [I@1702520b:~/download] [I@1702520b:~/download] [I@1702520b:~/download] [I@1702520b:~/download]`

What's New In TimeLord?

In computer science, a clock is a device that indicates or keeps track of time - In computer programming, a clock is a mechanism for indicating time, which may be implemented as a hardware or a software component. - A clock is also a process similar to a timer in computer programming and the name is derived from clockwork mechanisms. - For example, a clock is typically a computer which is connected to a time standard of a country. + =Note for developers= + TimeLord is a great tool for Unit Testing. It allows to freeze and modify the system clock. =Note for developers= =Note for developers= Line 24: Line 25: - This is very helpful because you can: + This is very helpful because you can: - - - * When you do Integration Testing, you can set a reference time, as a time when it happens, and freeze the system clock to create a time-stamped unit test. + - * When you test manually, you can set a time that you want to test against. + - * You can also simply check the current time to prove that it is set correctly in your system. + - - Before installation: + - - Go to the [TimeLord.net] web site, download the latest version and extract it. + - - In your eclipse directory: + - - Go to the plugin directory + - - cd -Eclipse/plugins/org.eclipse.datatools.timelord/\$VERSION/timelord\ + - - [TimeLord.net] zip to the + - - 'TimeLord.jar' + - - [TimeLord.net] jar to the +

System Requirements:

PC System Requirements: OS: Windows Vista or later CPU: Core i5 4th Generation or later RAM: 2 GB Video: DirectX 11 Hard Disk Space: 1.5 GB How To Install: 1. Unrar. 2. Burn or mount image and install. 3. Run game. 4. Copy cracked content from "patch-1.0.0.01-x86.part1.rar" and "patch-1.0.0
