Time Card Database Software Crack is a simple to use program that allows you to monitor the activity of your employees and generate reports for billable hours. The application is simple to use and allows you to quickly record the daily work hours for each member of staff in your company. Simple to configure database Time Card Database Software allows you to create daily timesheets, indicating the work hours for each of your employees. It is simple to use, since it allows you to manually fill in most of the fields and quickly append drop down menus. You can configure the database with employees' names, as well as job title, phone numbers, email and other contact details. Similarly, you can create a separate database for the work codes assigned to each job position in your company. Every time you wish to enter a time card in the database, you can easily select the name of the employee, the date, work code, then manually fill in the number of worked hours and description. Work code management The Work Code field in the timesheet editor holds a high importance, since it is the one that determines whether the worked hours are billable or not. This parameter determines the daily work norm for each employee and it is a criteria for generating reports. All the entries are displayed in the interface of Time Card Database Software: the name of the employee, date, work code, recorded hours and optionally, the job description. You may easily add new entries and edit or delete existing ones.
