What's New in the UxTheme Patch For Windows 7?

UxTheme Patch for Windows 7 is a Windows Vista/Windows 7 patch for increasing the users' ability to change themes without being limited by the Windows XP style installation. In the Vista era, it was possible to create new themes to be installed for the System, Desktop and Control Panel areas, but unfortunately for the users of Windows 7, only a few themes can be applied. Microsoft has decided to block the modification of the themes due to security reasons, but here is a workaround that allows you to use any theme, even though it will be unsigned. After downloading the patch, just copy and paste it to the System32 folder. There is no installation required, just copy the files and execute it. Once the files are in place, restart the system to apply the modifications. QuickBooks Desktop 10 - QuickBooks Desktop 10 is the new version of QuickBooks Desktop to be released on April 24, 2010.
