This lets you brighten or darken the image, achieve quick balanced adjustments, accomplish saturation corrections, and keep your images looking fresh and vibrant. On the right side of the Curves tool will be a preview of your image, with the color sliders highlighted. In the Curves tool, as you drag the color sliders to the left, the image darkens; as you drag them to the right, the image brightens up. This effect depends on capturing the right moment. With a laser-accurate zero-parallax camera app that mimics the camera, you can capture the perfect moment, save it, and then edit it as if you were editing any other RAW image. e3d0a04c9c
