Selections, adjustments and retouching are three core processes in professional image editing. Unfortunately, this means that Photoshop is quite heavy and there are many steps involved to perform these operations. The Create Custom Adjustment or Adjustment tab has been removed to make adjustments more accessible. Photographers new to Photoshop might not realize how much time is saved by being able to adjust each individual adjustment, like location and white balance, right from the document itself. With the release of the Creative Cloud desktop app, I can do all this in Photoshop and then send the adjusted layer to anyone else in my workspace or on the web. We can work together on the same document and it will look and work the same. Adobe Photoshop has three components that must be installed: the Photoshop application, Photoshop CC, and the Photoshop Express Cloud app. There are two versions of Photoshop available: Photoshop and Photoshop Elements.
